A Complete Guide to ...

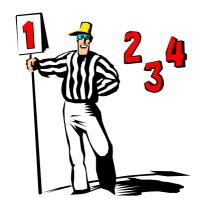

MATHEMATICS in the New Zealand CURRICULUM for

Level 4

This resource contains:

- ☑ Table of contents
- **☑** Teaching notes
- ☑ In class activity sheets involving
 - worked examples
 - basic skills
 - word problems
 - problem solving
 - group work
- ☑ Homework / Assessment activity sheets
- ☑ Answers

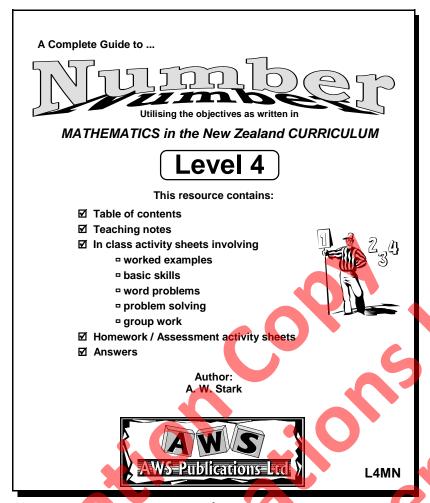

These resources are supplied as PHOTOCOPY MASTERS

This resource unit has been supplied on the understanding that copies of any part of this publication will not be given or sold to teachers or students from other schools or institutions.

This resource unit may be used as a master, and therefore can be photocopied, only by the school or institution that has purchased this resource unit.

Note from the author:

This resource ...

*A Complete Guide to Number

is one of a series of FIVE resources written utilising the objectives as stated in

Mathematics in the New Zealand Curriculum for Level 4.

With my experiences as a specialist mathematics teacher, I enjoyed mathematics as a subject, but I am aware that not all teachers feel the same way about mathematics. It can be a difficult subject to teach, especially if you are unsure of the content or curriculum and if resources are limited.

This series of resources has been written with you in mind. I am sure you will find this resource easy to use and of benefit to you and your class.

Resources in this series:

*A Complete Guide to Number

written utilising the objectives as stated in

Mathematics in the New Zealand Curriculum for Level 4

Resource Code: L4MN

A Complete Guide to Measurement

written utilising the objectives as stated in

Mathematics in the New Zealand Curriculum for Level 4.

Resource Code: L4MM

A Complete Guide to Geometry

written utilising the objectives as stated in

Mathematics in the New Zealand Curriculum for Level 4.

Resource Code: L4MG

A Complete Guide to Algebra

written utilising the objectives as stated in

Mathematics in the New Zealand Curriculum for Level 4.

Resource Code:

A Complete Guide to Statistics

written utilising the objectives as stated in

Mathematics in the New Zealand Curriculum for Level 4.

Resource Code: L4MSt

For more information about these and other resources, please contact ...

Acknowledgement:

I would like to thank the staff and pupils of **Mairehau Primary School, Christchurch** for their assistance in making these resources possible.

This resource has been divided into EIGHT sections as listed below.

Although there are no page numbers, the sections follow in sequential order as listed.

Note:

'In-class' Worksheets Masters are lesson by lesson reuseable worksheets that can be photocopied or copied on to an OHP.

Homework / Assessment Worksheets Masters can be used as homework to reinforce work covered in class or they can be used for pupil assessment.

Section	
0	List of Number Objectives: Table of 'In-class' Worksheets / Objectives covered
2	Table of Contents: 'In-class' Worksheets
8	'In-class' Worksheets Masters
4	Teaching Notes / Answers for 'In-class' Worksheets
	Table of Contents: Homework / Assessment Worksheets
6	Homework / Assessment Worksheets Masters
6	Answers for Homework / Assessment Worksheets
8	Worksheet tracking sheets for teachers to record pupil names / worksheets covered

Number

The following are the objectives for **Number**, **Level 4**, as written in the **MATHEMATICS** in the New Zealand Curriculum document, first published 1992. **[Refer Page 44]**

Exploring number

Within a range of meaningful contexts, students should be able to:

- **N1** explain the meaning of negative numbers;
- N2 explain the meaning and evaluate powers of whole numbers;
- **N3** find a fraction equivalent to one given;
- **N4** express a fraction as a decimal, and vice versa;
- **N5** express a decimal as a percentage, and vice versa;
- N6 express quantities as fractions or percentages of a whole.

Exploring computation and estimation

Within a range of meaningful contexts, students should be able to:

- N7 make sensible estimates and check the reasonableness of answers;
- N8 write and solve problems involving decimal multiplication and division;
- **N9** find a given fraction or percentage of a quantity;
- N10 explain satisfactory algorithms for addition, subtraction, and multiplication;
- **N11** demonstrate knowledge of the conventions for order of operations.

At the top of each 'In-class' worksheet and Homework / Assessment worksheet, the Number objective(s) being covered has been indicated. *EXAMPLE:* N1 means objective 1, N2 means objective 2, etc.

The Mathematical Processes Skills:

Problem Solving,
Developing Logic & Reasoning,
Communicating Mathematical Ideas,

are learned and assessed within the context of the more specific knowledge and skills of number, measurement, geometry, algebra and statistics. The following are the **Mathematical Processes Objectives** for **Level 4**.

Problem Solving Achievement Objectives [Refer page 24]

- MP1 pose questions for mathematical exploration;
- MP2 effectively plan mathematical exploration;
- MP3 devise and use problem-solving strategies to explore situations mathematically;
- MP4 find, and use with justification, a mathematical model as a problem-solving strategy;
- MP6 use equipment appropriately when exploring mathematical ideas.

Developing Logic and Reasoning Achievement Objectives [Refer page 26]

- MP8 classify objects, numbers and ideas;
- MP9 interpret information and results in context;
- MP10 make conjectures in a mathematical context;
- MP15 use words and symbols to describe and generalise patterns.

Communicating Mathematical Ideas Achievement Objectives [Refer page 28]

- MP16 use their own language and mathematical language and diagrams to explain mathematical ideas:
- MP17 devise and follow a set of instructions to carry out a mathematical activity;
- MP20 record information in ways that are helpful for drawing conclusions and making generalisations;
- MP21 report the results of mathematical explorations concisely and coherently.

Note

The codes MP1, MP2, etc. have been created by numbering the Mathematical Processes Achievement Objectives in order as listed in the MATHEMATICS in the New Zealand Curriculum document. The numbering gaps occur as not all objectives are covered at Level 4. [REFER TO PAGES 23 - 29 OF THE CURRICULUM DOCUMENT]

'In-class' Number Worksheets Table of Worksheet Number / Objectives Covered

See the opposite page for details of each objective.

	Number Objectives								Mathematical Processes Objectives

Table of Contents for the 'In-class' Worksheet Masters for Number, Level 4

Worksheet Number	Topic	Number Objective(s)
1	Adding and subtracting whole numbers / Multiplying and dividing whole numbers	Revision
2	Special numbers	Revision
3	Understanding negative numbers	N1
4	Understanding and using number lines	N1
5	More negative numbers / Bank overdrafts	N1
6	Squares & square roots	N2
7	Equivalent fractions	N3
8	Expressing a fraction as a decimal / Expressing a decimal as a fraction	N4
9	Expressing a decimal as a percentage / Expressing a percentage as a decimal / Converting between fractions, decimals and percentages	N4 / N5
10	Expressing a quantity as a fraction or percentage of a whole	N6
11	Rounding numbers and finding estimates	N7
12	Estimating totals involving money	N7 / N8
13	Multiplying and dividing by powers of 10	N8
14	Multiplying and dividing decimals	N8
15	Finding a fraction of a quantity	N9
16	Finding a percentage of a quantity	N9
17	Adding, subtracting and multiplying with accuracy	N10
18	Order of operations	N11
	Teaching Notes / Answers	

9

Please **DO NOT** write on the sheets

Please **DO NOT** write on the sheets

Adding and subtracting whole numbers:

The ability to add and subtract with speed and accuracy is a useful skill.

Setting out is important, especially when a calculator is not being used.

Example: 235 + 956 could be written as ... 235

and 1509 - 986 could be written as .. 1509

10

16

17

11

+ 956 - 986

Task 1

- 1. **Copy** this 'number cross' into the squares of your maths book.
- 2. Use the clues for across and down to complete the number cross by working out these addition and subtraction problems.

Clues across

1	195 + 378	

Clues down

- 3. 5000 703
- 6. 453 361

12

Multiplying and dividing whole numbers:

The ability to multiply and divide with speed and accuracy is also a useful skill.

Setting out is important, to help avoid making mistakes.

Example: 135×12 could be written as ... 135 and $4816 \div 4$ could be written as ... $4\sqrt{48}$

× 12

Task 2

- 1. Copy this 'number cross' into the squares of your maths book.
- 2. Use the clues for across and down to complete the number cross by working out these multiplication and division problems.

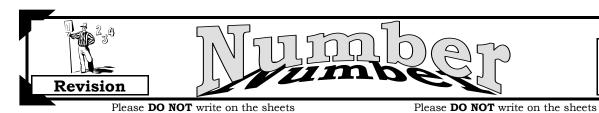

Clues across

- 1. 25 × 7
- 5. 960 ÷ 4
- 8. 31 × 3 12. 762 ÷ 6
- 15. 403 × 6
- 3. 820 × 3
- 6. 343 ÷ 7
- 10. 1104 ÷ 3 14. 64 × 9
- 17. 2404 × 5

Clues down

- 1. 868 ÷ 7
- 4. 2476 ÷ 4
- 11. 1718 × 5
- 16. 891 ÷ 11
- 2. 468 ÷ 9
- 7. 1604 × 6
- 12. 1016 ÷ 8
- 3. 504 × 4
- 9. 6338 × 5
- 13. 852 ÷ 12

Special numbers:

"Is the number 6 a prime number?" asked Linda.

"Can you list the first five multiples of 7?" asked Michelle.

"Can you list the factors of 12?" asked Nigel.

Prime numbers, multiples, factors and prime factors are all special types of numbers.

Discuss what makes these numbers special.

Task 3

Copy each sentence below about these special numbers, replacing the * with one of the words listed below.

- A number can only be divided by two numbers, itself and 1.
- 2. The \bullet of a number are found by multiplying the number by 1, 2, 3, 4, 5, etc and recording the answers.
- A of a given number is a whole number that divides exactly into the 3. given number. There is no remainder.
- A
 ightharpoonup is a factor that is a prime number. 4.

factor multiples prime prime factor

13.

19.

48

23

Working with prime numbers.

- List the first 10 prime numbers. List the prime numbers between 40 and 50.
- 7. Which numbers in this list are prime numbers? 5, 8, 11, 15, 21, 23, 27, 31, 37, 42, 49, 51, 89, 91

15

18.

The number 9 can be written as two prime numbers. Example: 7 + 2 = 9.

Write these numbers as two prime numbers.

15

Working with multiples.

List the first 10 multiples of these numbers.

- 14. 16. 17. 12 19
- List the multiples of 8 that are less than 45. 20.
 - List the multiples of 7 that are between 20 and 60.
 - List the multiples of 13 that are between 35 and 80.

Working with factors.

8.

7

List the factors of these numbers.

23. 18 27 28. 36

The number 15 can be written as two prime factors. Example: $3 \times 5 = 15$

2.

Write these numbers as two prime factors.

29. 14 30. 77 32. 65 33. 51 34. 85

Task 4

Guess the number game: Read the clues in the box below and then work out the number.

- 1. I am an odd number. I am greater than 30, but less than 45. I am a multiple of 7. What number am I?
- I am an even number. I am greater than 40, but less than 56. I am a multiple of 9. What number am I?
- Create 5 similar 'Guess the 3. number' questions, where there is only one correct answer. Exchange your questions with a classmate.

Please **DO NOT** write on the sheets

Understanding negative numbers:

Examples: Last night there was a 5 degree frost.

A building has two car park levels beneath the ground floor.

A diver went 30 metres below the surface of the sea.

John's bank account is in overdraft by the sum of \$200.

In these examples, the numbers mentioned could be written as negative numbers.

Answers: a -5° C frost, car park levels -1 and -2, -30m below the surface, and -\$200 bank balance.

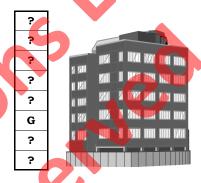

Positive numbers are above zero and the positive sign does not have to be shown.

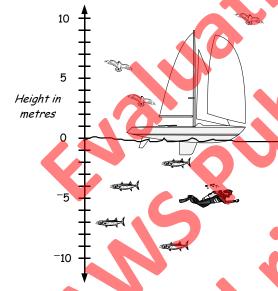

Negative numbers are below zero, and the small negative sign must be shown.

Task 5

A new 6 storey office block has been built, with two additional levels below ground level.

- 1. How would you label the floors of this building. G = ground floor.
- 2. If Miri was on the 2nd floor and goes down 3 floors, which floor would she be at?
- 3. If Rangi was two floors below the ground floor and goes up 5 floors, which floor would he be on?

This diagram shows a sailing ship, a diver, some birds and some fish. The sea level is at zero on the scale drawn.

- 4. How high is the mast above the sea level?
- 5. State the height of each bird above the sea level as positive numbers.
- 6. State the depth of the 4 fish below sea level as negative numbers.
- 7. State the depth of the diver below sea level as a negative number.

A bird is flying 4 metres above the sea, then drops 7 metres straight down.

 State the depth the bird reaches below the surface of the sea, as a negative number.

The temperature scale is one of the most commonly used scales that uses negative numbers, especially when recording maximum and minimum daily temperatures.

9. What is the temperature on this diagram of a thermometer?

Use the thermometer scale to calculate the new temperatures after the following changes ...

- 10. Starting temperature 7°C, drops 5°C
- 12. Starting temperature 5°C, drops 9°C
- 14. Starting temperature $^{-2}$ °C, rises 7°C
- 16. Starting temperature $^{-1}{}^{\circ}C$, drops $6^{\circ}C$
- 18. Starting temperature 4°C, drops 10°C
- 20. Starting temperature $^{-8}^{\circ}C$, rises $6^{\circ}C$
- 11. Starting temperature 2°C, rises 5°C
- 13. Starting temperature 3°C, drops 10°C
- 15. Starting temperature 0°C, drops 8°C
- 17. Starting temperature $^{-6}$ °C, rises 9°C
- 19. Starting temperature $-3^{\circ}C$, drops $5^{\circ}C$
- 21. Starting temperature $^{-}6^{\circ}C$, rises $6^{\circ}C$

Understanding and using number lines:

Positive and negative numbers can be represented on a number line. A number line goes on forever, in both

directions. Example:

A number line can be used to add positive and negative numbers together.

Example:

The first number of the question is the starting point on the number line.

When you add 9 on a number line, which direction do you move? When you add $^{-7}$ on a number line, which direction do you move? Answer: Move 9 to the right. Answer: Move 7 to the left.

Task 6

Use the number lines below to add these positive and negative numbers together. The starting number has been marked with a dot on the number line.

1.

2.

10

5.

Add these positive and negative numbers, using the number line above, if required.

17.
$$^{-7}$$
 + 16

23.
$$7 + ^{-}18$$

26.
$$-8 + 19$$

$$28. -2 + 6$$

Task 7

Using a die (dice), play this game in small groups.

The odd numbers are negative, that is, $^{-1}$, $^{-3}$ & $^{-5}$. The even numbers are positive, that is, 2, 4 & 6.

Roll the die 5 times, recording the numbers that appear, then add up the numbers.

Example: $2 + ^{-}3 + ^{-}1 + 6 + ^{-}5 = ^{-}1$.

Continue until each pupil has had 5 turns, then total your scores.

The winner is the pupil with the lowest combined score.

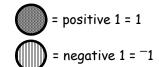

Please **DO NOT** write on the sheets

More negative numbers:

Sally drew two different coloured circles to represent positive and negative numbers.

Example: What numbers do these two groups of circles represent?

Answer: 5 and $^-6$

(Note: The positive sign is left off the 5)

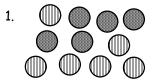

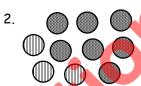

If one positive circle and one negative circle cancel each other, what number do all the circles above represent?

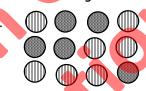

Answer: 5+6:

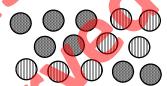

Task 8

Count the positive and negative circles in each group below and write a simple mathematical sentence for each. Remember one positive circle cancels one negative circle. Example: $4 + ^-9 = ^-5$.

Work out these questions involving adding positive and negative numbers.

- 5. ⁻6 + 7
- 6. 9 + ⁻12
- 7. -10+9
- 8. 15 + -1
- 9. ⁻11 + 14

- 10. 20 + ⁻18
- 11. -18 + 12
- 12. 13 + ⁻12
- 13. -14 + 18
- 14. 19 + ⁻19

- 15. ⁻20 + 25
- 16. 18 + ⁻19
- 17. ⁻23 + 21
- 18. 19 + -20
- 19. ⁻24 + 27

- 20. 31 + ⁻27
- 21. 27 + ⁻30
- **22**. 29 + ⁻32
- 23. 36 + ⁻40
- 24. 50 + 46

- 25. ⁻50 + 42
- 26. ⁻15 + ⁻10
- 27. 27 + ⁻36
- 28. ⁻18 + ⁻23
- 29. 28 + ⁻33

Bank overdrafts:

When you spend more money than you have in your bank account, your bank account is said to be in overdraft. The balance of your account could be written as a negative number.

Banks allow you to go into overdraft, so they can charge you interest on the negative balance.

Example: \$200 means the account is \$200 in overdraft.

If Mr Keys has \$150 in the bank and withdraws \$200, what will his bank balance be? Answer: -\$50

Task 9

When money is deposited into an account or withdrawn from an account, it is called a transaction.

Copy this table below, then calculate the new balance of this bank account after each transaction.

1.	Date	Detail	Withdrawals		Deposit	s	Balance	
	14/11	Opening balance					\$250	00
	15/11	Bought new bike	\$295.	00				
	17/11	Wages from part-time job			\$85	60		
	21/11	Bought new clothes	\$75	90				
	25/11	Garage sale profits			\$87	50		

Create your own bank balance questions and exchange with a classmate.

2.

Squares & square roots:

When a number is multiplied by itself, such as ... 1×1 , 2×2 , 3×3 , 4×4 , 5×5 , 6×6 , 7×7 , 8×8 etc. ... the answers that are created, are numbers known as squares. That is, 1, 4, 9, 16, 25, 36, 49, 64, ...

These can be written as 1^2 , 2^2 , 3^2 , 4^2 , 5^2 , etc., where the small number 2 is called a **power**. In this case it is the power of 2. We say 1^2 as one squared, 2^2 as two squared, 3^2 as three squared, etc. Find the value of nine squared, which is written as 92 Answer: $9 \times 9 = 81$

The opposite of squaring a number is to find the **square root**. The symbol for square root is $\sqrt{}$ Example: If $9^2 = 81$, then $\sqrt{81} = 9$. Find the square root of 144 or $\sqrt{144}$. Answer: 12

What key on a calculator would you use to find the square root of a number? Answer: 1

Task 10

Calculate the squares of these numbers.

- 6² 2. 1.
 - 92
- 12² 3.
- 10²
- 5²

- **7**² 6.
- 8² 7.
- 15² 8.
- 9. 20^{2}
- 10. 30²

100² 11.

21.

- 12. 50²
- 200^{2}
- 14 1000
- 250 15.

 34^{2} 16.

 0.9^{2}

 7.3^{2} 17.

 0.25^{2}

- 4.6^{2} 0.85^{2}
- 5.9^{2} 19. 0.12^{2} 24.
- 20 2.82 1.54² 25

Calculate the square roots of these numbers.

22.

- √64 26.
- √16 27.
- √81 28.

289

- 29. $\sqrt{121}$
- 30. √49

- $\sqrt{25}$ 31. √100 36.
- √144 32 √196
- 33.

38.

- √9 34. 39. √1600
- √900 35. 40. √2500

Cubes and other powers:

If 22 means 2 × 2, what does 23 mean?

Answer: 2 cubed or $2 \times 2 \times 2 = 8$

Discuss what 2^4 , 2^5 or 2^6 mean.

Answer: "two to the power of 4" How do you say 24?

Task 11

Write the following as numbers, without working out the answers ...

- three to the power of five, 1.
 - four to the power of three, 2.
 - five to the power of six,
 - seven to the power of three,
 - nine to the power of four,
 - ten to the power of six,
 - 7. twelve to the power of three,
 - twenty to the power of five.

Calculate the following.

- 9. 3³
- **4**³ 10.
- 5^3 11.
- 10³ 12.

- 2⁵ 14.
- 2⁶ 15.

- 2⁴ 13.

- 3⁵ 16.
- **7**³ 17.
- **9**³ 18.

- 64 19.
- 20. 94
- 8⁴ 21.
- 22. 10⁴
- 23. **5**⁵

Equivalent fractions:

A fraction is part a whole.

Example: A pie is cut into four equal pieces. Each piece of the pie is one quarter of the whole pie. Written as $\frac{1}{4}$, it means 1 out of 4.

If a pie was cut into 8 equal pieces, how many pieces would make up a quarter of the pie?

Answer: 2 out of 8 = $^{2}/_{8}$,

The fractions $^{1}/_{4}$ and $^{2}/_{8}$, are **equivalent fractions**, as they represent the same part or fraction of a whole. **Discuss** other fractions that are equivalent to $^{1}/_{4}$.

Task 12

1. What fraction of each group of diagrams (A to H) is shaded?

Α

From your answers to question 1 above, match the equivalent fractions. 2.

To create equivalent fractions, multiply (or divide) the top and bottom numbers of the fraction by the same number. An equivalent fraction to $\frac{1}{4}$ can be created by multiplying by 5, or any other number.

Example: $\frac{1}{4} \times \frac{5}{5} = \frac{1 \times 5}{4 \times 5} = \frac{5}{20}$. Another equivalent fraction would be ... $\frac{1}{4} \times \frac{9}{9} = \frac{1 \times 9}{4 \times 9} = \frac{9}{36}$

$$\frac{1}{4} \times \frac{9}{9} = \frac{1 \times 9}{4 \times 9} = \frac{9}{36}$$

Complete each calculation to create equivalent fractions.

3.
$$^{1}/_{4} \times ^{5}/_{5} = \spadesuit$$

4.
$$^{1}/_{2} \times ^{8}/_{8} = 4$$

3.
$$\frac{1}{4} \times \frac{5}{5} = 4$$
4. $\frac{1}{2} \times \frac{8}{8} = 4$
5. $\frac{1}{5} \times \frac{5}{5} = 4$
6. $\frac{1}{7} \times \frac{4}{4} = 4$
7. $\frac{2}{7} \times \frac{4}{4} = 4$
8. $\frac{2}{3} \times \frac{7}{7} = 4$
9. $\frac{3}{8} \times \frac{7}{7} = 4$
10. $\frac{5}{8} \times \frac{5}{5} = 4$
11. $\frac{3}{8} \times \frac{3}{3} = 4$
12. $\frac{4}{9} \times \frac{5}{5} = 4$
13. $\frac{6}{11} \times \frac{3}{3} = 4$
14. $\frac{3}{7} \times \frac{11}{11} = 4$

6.
$$\frac{1}{7} \times \frac{4}{4} = \spadesuit$$

7.
$$^{2}/_{7} \times ^{4}/_{4} = \bullet$$

8.
$$^{2}/_{3} \times ^{7}/_{7} = 4$$

9.
$$\frac{3}{8} \times \frac{7}{7} = 4$$

10.
$$\frac{5}{8} \times \frac{5}{5} = \Phi$$

11.
$$^{3}/_{8} \times ^{3}/_{3} = \spadesuit$$

12.
$$\sqrt[4]{9} \times \sqrt[5]{5} = 4$$

13.
$$6/_{11} \times 3/_3 = 4$$

14.
$$^{3}/_{7} \times ^{11}/_{11} = 4$$

Copy and complete these equivalent fractions as you replace the \spadesuit with a number.

16.
$$\frac{1}{2} = \frac{4}{10}$$

18.
$$^{1}/_{5} = ^{4}/_{20}$$

20.
$$^{3}/_{4} = ^{4}/_{12}$$

15.
$$\frac{1}{4} = \frac{1}{8}$$
 16. $\frac{1}{2} = \frac{1}{10}$ 17. $\frac{1}{3} = \frac{1}{9}$ 18. $\frac{1}{5} = \frac{1}{20}$ 19. $\frac{1}{8} = \frac{1}{32}$ 20. $\frac{3}{4} = \frac{1}{12}$ 21. $\frac{2}{3} = \frac{1}{12}$ 22. $\frac{3}{5} = \frac{1}{10}$ 23. $\frac{4}{7} = \frac{1}{14}$ 24. $\frac{5}{6} = \frac{1}{30}$ 25. $\frac{5}{12} = \frac{1}{24}$ 26. $\frac{8}{16} = \frac{1}{4}$ 27. $\frac{15}{30} = \frac{15}{30} = \frac$

22.
$$^{3}/_{5} = ^{4}/_{10}$$

25.
$$\frac{5}{12} = \frac{4}{24}$$

Match the fractions listed below with an equivalent fraction in the box, then create your own equivalent fraction for each.

32.
$$^{2}/_{3}$$

33.
$$^{3}/_{5}$$

Expressing a fraction as a decimal:

The top number of a fraction is called the **numerator**. The bottom number is called the **denominator**. Example: In the fraction $\frac{3}{4}$, 3 is the numerator and 4 is the denominator.

Fractions can be converted into decimals by dividing the numerator by the denominator.

Example: Convert $\frac{3}{4}$ to a decimal.

Zeros will need to be added after the decimal point.

You keep dividing until there is no remainder or there are at least 3 digits after the decimal point.

Answer: The fraction $\frac{3}{4}$ converted to a decimal is 0.75.

Some fractions can be simplified by dividing the numerator and denominator by the same number. Example: $^{50}/_{100}$ (divide by 10) = $^{5}/_{10}$ (divide by 5) = $^{1}/_{2}$ This will make the conversion to a decimal easier.

Some fractions create interesting decimals, with a recurring pattern of digits.

Example: $\frac{2}{9} = 0.2222$ This small dot means that the 2's go on forever.

 3 /₁₁ = 0.272.7 Both the digits 2 and 7 repeat in this decimal.

Task 13

Convert these fractions to decimals. Some fractions can be simplified first. Example: 8/10 = 4/5

1. 1/4

$$2. \frac{3}{8}$$

3.
$$^{1}/_{10}$$

10.
$$^{3}/_{10}$$
15. $^{1}/_{2}$

11.

Investigate the patterns created when you convert these fractions ...

21. $\frac{1}{11}$, $\frac{2}{11}$, $\frac{3}{11}$, $\frac{4}{11}$, $\frac{5}{11}$, $\frac{6}{11}$, $\frac{7}{11}$, $\frac{8}{11}$, $\frac{9}{11}$ and $\frac{10}{11}$ to decimals.

23. $\frac{1}{7}, \frac{2}{7}, \frac{3}{7}, \frac{4}{7}, \frac{5}{7}$ and $\frac{6}{7}$ to decimals.

Expressing a decimal as a fraction:

Decimals can be expressed as special fractions, with denominators of 10, 100, 1000 etc. *Example:* Convert 0.5, 0.25 and 0.013 to fractions.

Answers: One digit after the decimal point, therefore 10 is the denominator, $^{5}/_{10}$ Two digits after the decimal point, therefore 100 is the denominator, $^{25}/_{100}$ Three digits after the decimal point, therefore 1000 is the denominator, $^{13}/_{1000}$

Task 14

Convert these decimals to fractions.

1.	0.9	2.	0.09	3.	0.009	4.	0.23	5.	0.014
6.	0.12	7.	0.3	8.	0.302	9.	0.42	10.	0.3
11.	0.345	12.	0.0234	13.	0.95	14.	0.8	15.	0.69
16.	0.8	17.	0.635	18.	0.7	19.	0.309	20.	0.0005
21.	0.94	22.	0.07	23.	0.903	24.	0.63	25.	0.625

Please **DO NOT** write on the sheets

Expressing a decimal as a percentage:

Fractions which are out of 100 are commonly known as **percentages**. *Example:* 25 out of 100 could be written as the fraction $^{25}/_{100}$ or as a percentage 25%, which is read as "25 per cent".

To convert a decimal to a percentage, multiply the decimal by 100.

Example: $0.2 \times 100 = 20\%$, $0.06 \times 100 = 6\%$, $1.25 \times 100 = 125\%$

Convert these decimals to percentages.

1.	0.25	2.	0.09	3.	0.06	4.	0,15	5.	0.014
6.	0.19	7.	0.3	8.	0.65	9.	0.42	10.	0.95
11.	0.345	12.	0.45	13.	0.095	14.	0.8	15.	0.6
16.	0.75	17.	0.635	18.	0.7	19.	0.309	20.	0.01
21.	0.045	22.	1.3	23.	2.65	24.	0.035	25.	0.065

Expressing a percentage as a decimal:

Percentages are out of 100 and can be written as a fraction. To convert a fraction to a decimal we divide the numerator by the denominator. For all percentages written as fractions, the denominator is 100. Therefore to convert a percentage to a decimal, divide the percentage by 100.

Example: Convert 60% to a decimal.

Answer: 60% is the same as $60/_{100}$, therefore $60 \div 100 = 0.6$

To convert a percentage to a decimal, divide the percentage by 100.

Task 16

Convert these percentages to decimals.

1.	65%	2. 50%	3.	9%	4.	15%	5.	45%
6.	87%	7. 55%	8.	100%	9.	17%	10.	5%
11.	52%	12. 40%	13.	93%	14.	80%	15.	23%
16.	75%	17. 66%	18.	30%	19.	37.5%	20.	80.5%
21.	1.8%	22. 140%	23.	235%	24.	137%	25.	306%

Converting between fractions, decimals and percentages.

Task 17

Copy this table of commonly used fractions, decimals and percentages.

Complete the table by filling in the gaps using the fractions, decimals and percentages from the box at the right.

Fraction	Decimal	Percentage
1/4		
	0.3	
		40%
1/2		
		66.6*%
	0.75	

0.4	0.5	0.6
0.25	1/3	75%
25%	50%	3/4
² / ₅	33.3'%	² / ₃

Please **DO NOT** write on the sheets

Expressing a quantity as a fraction or percentage of a whole:

Six pupils in a class of 24 like playing hockey.

Four out of 20 pupils were away from school today.

On 10 of the last 20 days it has rained.

In all of these statements there is information that can be expressed or written as a fraction or a percentage.

Example: $\frac{6}{24}$ or $\frac{1}{4}$ or 25% of the pupils like playing hockey,

 $^{4}/_{20}$ or $^{1}/_{5}$ or 20% of the pupils were away from school today.

On $^{10}/_{20}$ or $^{1}/_{2}$ or 50% of the last 20 days it has been raining.

Discuss events that you can express as fractions or percentages.

Task 18

Express the shaded diagrams as a fraction and as a percentage of each group of diagrams.

Read each statement and write the information as a fraction.

- 5. Joanne scored 21 out of 25 in a maths test.
- 7. Of 50 pets, 29 were cats.
- 9. What fraction of your class are girls?
- 6. 31 pupils in a school of 250 are in Room 7.
- 8. It has rained on 5 days this week.
- 10. What fraction of the week is the weekend?

Read each statement and write the information as a percentage. Follow the steps in this example below. Example: Sally scored 15 out of 20 in a test.

Step 1: Write the information as a fraction.

- ¹⁵/₂₀
- Step 2: Write an equivalent fraction, with a denominator of 100.
- $^{15}/_{20} \times ^{5}/_{5} = ^{75}/_{100}$
- Step 3: Write the fraction as a decimal, then multiply by 100, or 75 out of 100 is 75%.
- 0.75 × 100 = 75%

- 11. Joanne scored 80 out of 100 in a maths test.
- 12. 25 pupils in a school of 100 are in Room 7.

13. Of 50 pets, 24 were cats.

- 14. It has rained during 15 days out of 20 days.
- 15. 7 out of 25 pupils were away from school.
- 16. 2 out of 3 people watch the rugby test.

Mr Moore's car has a 50L petrol tank. He goes on a long trip and then refills the tank.

17. If the refilling of the petrol tank takes 35L, what fraction of a full tank was used during the trip? Convert your answer to a percentage.

A school cross country race is 4 laps around the school grounds.

- 18. If Karen has completed 3 laps, what **fraction** of the race has she completed so far? **Convert** your answer to a **percentage**.
- 19. What percentage of the race does she have left to run? Convert your answer to a fraction.

Please **DO NOT** write on the sheets

Rounding numbers and finding estimates:

When an accurate answer is not required or when doing a quick calculation, rounding a number can be a useful skill to use.

Example: What would 19 items at \$9.95 each cost?

Answer: Round 19 to 20 and round \$9.95 to \$10, estimated price would be 20 × \$10 = \$200.

The exact cost would be $$9.95 \times 19 = 189.05 .

How close was the estimate?

Task 19

Round these numbers to the nearest 10.

- 1. 27
- 2. 52
- 3. 85
- 4. 71
- 129

- 6. 143
- 7. 175
- 8. 231
- **9**. 266
- 10. 342

Round these numbers to the nearest 100.

- 11. 53
- 12. 143
- 13. 251
- 14. 732
- 15. 942

- 16. 1346
- 17. 1637
- 18. 3248
- 19. 4386
- 20. 5084

Round these numbers to the nearest 1000.

- 21. 3658
- 22. 2423
- 23. 6495
- 24. 7510
- 25. 3417

- 26. 6709
- 27. 8349
- 28. 7362
- 29. 9852
- 30. 9234

Round these numbers to the nearest 10, 100 or 1000, before working out an estimated answer.

- 31. 98 + 183
- 32. 594 209
- 33. 79 × 34
- **3**4. 495 ÷ 9

- 35. 1186 × 23
- 36. 9568 + **3149**
- 37. 5016 ÷ 11
- 38. 6124 3867
- 39. Calculate the actual answers for questions 31 to 38 above. How close were your estimates?

A truck driver records the distances he travels each day for a week as shown below.

149km, 205km, 93km, 112km, 166km, 131km, 185km

- 40. Work out the estimated total distance he travelled by rounding to the nearest 10km.
- 41. Calculate the exact distance travelled during this week.
- 42. If it costs 57 cents per kilometre to run the truck, estimate the cost of running the truck for this week. Calculate the exact running costs.

The length of each telephone call Brian made during the weekend has been recorded below. The time has been recorded in minutes.

- 19, 27, 12, 23, 41, 26, 8, 17, 29, 42
- 43. Work out the estimated total time he spoke on the telephone by rounding to the nearest 10 minutes.
- 44. Calculate the exact time Brian spoke on the telephone.
- 45. If calls cost 22 cents a minute, **estimate** the cost of Brian's telephone calls. **Calculate** the exact cost of his telephone calls.
- 46. **Create** your own questions that involve estimating. Exchange your questions with a classmate so that she / he can work out the estimated answers, then the exact answers.

Please **DO NOT** write on the sheets

Estimating totals involving money:

As Jenny went around the supermarket, she kept a running total of how much she was spending. Example: The items she bought cost ... \$1.95, \$0.95, \$4.20, \$5.90, \$1.05 and \$9.95.

What totals do you think Jenny added up as she shopped?

Answer: 2, 1, 4, 6, 1 and 10, giving her a total of 24. Therefore Jenny has spent about \$24 so far.

The ability to estimate quickly and accurately can be a useful skill.

Task 20 corn cobs mushrooms \$1.90 / kg \$5.90 / kg 3 for 90 cents \$2.45 / doz \$7.90 / kg potatoes beans bananas cereal cheese \$3.10 / 3kg bag \$2.90 / kg \$2.80 / kg \$3.65 / box \$4.60 / 1kg block

Estimate the cost of buying

- 4kgs of carrots,
- 2 dozen eggs,
- 3. 3 boxes of cereal.
- 4. Estimate the total cost of each shopping list (A to H) by rounding the cost of each item first.

List B List A List C List D 3kgs of carrots 2kgs of carrots 1kg of broccoli 2 dozen eggs 9 corn cobs 3kgs of potatoes 1kg of broccoli 11/2 kgs of mushrooms 1 dozen eggs 2kgs of beans 12 corn cobs 6kgs of potatoes 1/2kg of mushrooms 11½kgs of bananas 1kg of mushrooms 2kgs of beans 1kg block of cheese 2 boxes of cereal 6kgs of potatoes 2kgs of cheese List E List F List H List G 2kg of broccoli 3kgs of beans 4kgs of carrots 2kgs of mushrooms 3kgs of cheese ½kg of mushrooms 1½kgs of broccoli 1½kgs of beans 2 boxes of cereal 9kgs of potatoes 12kgs of potatoes 3kgs of bananas 1 dozen eggs 2kgs of cheese 1 dozen eggs 15 corn cobs 9kgs of potatoes 3kgs of carrots ½kgs of bananas 2kgs of cheese 9 corn cobs 6 corn cobs 3kgs of beans 3kgs of cheese

- 5. Check how close your estimate totals are by calculating the actual cost of each shopping list (A to H) above.
- 6. Create your own shopping lists using the items above, or make up your own items and prices. Have a classmate work out the estimated cost and actual cost of each shopping list.

Please **DO NOT** write on the sheets

Multiplying and dividing by powers of 10:

Some of the powers of 10 and the numbers they represent are listed below.

 $10^1 = 10$, $10^2 = 100$, $10^3 = 1000$, $10^4 = 10000$.

To multiply and divide by the powers of 10 is not as difficult as it might seem.

Examples: $1.3 \times 10000 = 13000$, $56.2 \times 100 = 5620$, $785.4 \div 100 = 7.854$, $9.7 \div 1000 = 0.0097$

In each example, the digits have remained the same, but the decimal point has moved.

Task 21

Calculate the following.

- 1. 5.3 × 100
- 2.
- 7.7×1000
- 3. 84 × 100
- 4. 0.6 × 1000

- 5. 1.9 × 10000
- 6. 6.37 × 100
- 94.3 × 10000
- 8.05 × 10000

- 9. 562 × 100
- 10. 0.07 × 1000
- 1. 1.94 × 1000
- 12. 0.059 × 100

- 13. 2.6×10^4
- 14. 1.5×10^3
- 15. 9.6×10^4
- 16. 5.2×10^5
- 17. Look at the answers for the questions above involving multiplication. Can you describe a simple method for working out the answers without having to actually do the calculation?

Calculate the following.

- 18. 6.3 ÷ 10
- 19. 5.1 ÷ 1000
- 20. 97 ÷ 100
- 21. 165 ÷ 1000

- 22. 3.8 ÷ 1000
- 23. 4.27 ÷ 100
- **24**. **123**.8 ÷ 10000
- **25.** 12.05 ÷ 10000

- 26. 712 ÷ 100
- 27. 0.27 ÷ 1000
- 28. 1.87 ÷ 1000
- **29**. 5.3 ÷ 10

- 30. $9.6 \div 10^3$
- 31. $4.7 \div 10^2$
- 32. 1.5 ÷ 10⁴
- 33. $3.3 \div 10^2$
- 34. Look at the answers for the questions above involving division. Can you describe a simple method for working out the answers without having to actually do the calculation?

Use your methods described above to answer these questions.

- 35. 3.95×10^3
- 36. $6.25 \div 10^2$
- $37. \quad 9.62 \times 10^5$
- 38. $3.091 \div 10^2$

- 39. 2.68×10^4
- 40. 9.346 × 10⁶
- 41, 2.75 ÷ 10⁴
- 42. 9.785×10^5

46.

In a market garden, lettuce plants are planted in rows of 100 plants.

- 43. Calculate the number of lettuce plants in 8 rows.
- 44. How many rows of lettuce plants are used up if 250 lettuces were picked last week?

A school sells pens and note books to its pupils.

- 45 Calculate the cost of buying 100 pencils at 25 cents each.
 - If 1000 school note books cost \$600.00, what would it cost to buy one note book?

A brick fence is to be built using 10000 bricks.

- 47. Calculate the cost of the bricks, if each brick costs 25 cents.
- 48. If 1000 bricks \$400.00, calculate the cost of one brick.

In a national raffle, there are 100000 tickets to be sold.

49. If tickets sell for \$1.50, how much money will be made when all tickets are sold?

A second raffle raised \$200000 from the 100000 tickets sold.

50. What was the cost of the tickets in the second raffle?

Please **DO NOT** write on the sheets

Multiplying and dividing decimals:

When multiplying or dividing using decimals, setting out the question correctly is important, especially when a calculator is not being used.

Example: 2.38 × 0.9 could be rewritten as

By counting the digits to the right of the decimal point in the question, the position of the decimal point in the answer can be found.

$$0.5 | 3.65$$
 $\longrightarrow 07.3$ $\longrightarrow 5 | 36.5$

The decimal point is moved to the right, the same number of places in both numbers, so that you are dividing by a whole number.

That is, 0.5 becomes 5, and 3.65 becomes 36.5.

Task 22

Calculate the following, setting out the questions correctly to avoid mistakes.

A school is going to buy some new computers that will cost \$2195.90 each.

21. Calculate the cost of buying 4, 7 and 12 computers.

A school is charged 1.5 cents per copy, for photocopying A4 sized paper.

- 22. Convert 1.5 cents to dollars.
- 23. Calculate the cost of copying 700, 1000 and 1500 copies. State your answers in dollars.

A travelling salesman recorded the distances he travelled each day for a week, including the weekend.

24. If he travelled 612.92km during this week, calculate the average (mean) distance he travelled each day of the week.

- 26. If he used 66L of petrol, at a cost of \$0.875 / L, calculate the total cost of petrol he used.

A motor cycle race is being raced around a local street course that is 3.75km per lap.

27. Calculate the total distance of a 20 lap, 50 lap and 100 lap race? Answer in kilometres.

The average time taken per lap is 69.3 seconds.

- 28. Calculate the time taken to complete a 75 lap race. Answer in seconds.
- 29. Convert the race time to minutes.
- 30. Create word problems involving the multiplication and division of decimals. Exchange your questions with a classmate and compare answers.

Please **DO NOT** write on the sheets

Finding a fraction of a quantity:

Kim has \$60 that is to be shared among 4 people. Each person will receive a quarter of the amount. Example: Find $\frac{1}{4}$ of \$60.00, then find $\frac{3}{4}$ of \$60.00.

Answers: $\frac{1}{4}$ means 1 out of 4, therefore divide the total by 4. \$60 ÷ 4 = \$15

 $\frac{3}{4}$ means 3 out of 4, therefore, divide the total by 4 and multiply by 3. $$60 \div 4 = 15 , $$15 \times 3 = 45

Task 23

Calculate the following fractions of these whole numbers.

- 1. $^{1}/_{4}$ of 40
- 2. $^{1}/_{5}$ of 60
- 3. $^{1}/_{6}$ of 36
- 4. ¹/₉ of 45

- 5. $^{1}/_{10}$ of 90
- 6. $^{2}/_{5}$ of 40
- 7. $\frac{3}{8}$ of 56
- 8. $^{2}/_{7}$ of 42

- 9. $\frac{5}{9}$ of 54
- 10. $^{7}/_{8}$ of 56
- 11. 6/7 of 63
- 12. ²/₉ of 45

- 13. $\frac{5}{6}$ of 60
- 14. $^{7}/_{11}$ of 77
- 15. ³/₄ of 72
- 16, ⁵/₈ of 96

- 17. $\frac{5}{7}$ of 42
- 18. 8/11 of 88
- 19. ⁵/₆ of 54
- 20. ⁷/₉ of 81

One third of a class of 24 pupils have been involved in a Mathematics competition.

21. Calculate the number of pupils who were involved in this competition.

One quarter of a class of 28 play softball.

Calculate the number of pupils who play softball.

During the past 30 days, the weather conditions were recorded.

- 23. On $\frac{1}{5}$ on the days it rained. Calculate the number of days it rained.
- 24. On $^3/_5$ on the days it was sunny. Calculate the number of days it was sunny.

During the holidays, Karen has been camping with her friends.

- 25. On the first day they spent ³/₈ of the day tramping to the camp site. Calculate the number of hours they spent tramping.
- 26. On the second day, they spent ⁵/₁₂ of the day resting.
 Calculate the number of hours they spent resting.

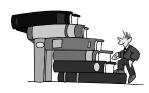

A school cross country race is run over a distance of 5400m.

- 27. If Rangi has completed 7/10 of the course, calculate how far he has run so far.
- 28. How far does Rangi have left to run? Give your answer as a fraction of the total distance and state the distance he has left to run.

A 36m long fence around a swimming pool is to be painted.

- 29. If ⁵/₁₂ of the fence has already been painted, calculate the length of the fence that has been painted.
- 30. What fraction of the fence has yet to be painted?

In the school library there are 480 books.

- 31. If $^{1}/_{3}$ of the books are suitable for pupils 9 years old or younger, how many books is that?
- 32. If $\frac{5}{12}$ of the books are fiction, how many books is that?
- 33. If $\frac{3}{8}$ of the books are non-fiction, how many books is that?
- 34. Create word problems involving finding fractions of a quantity. Exchange your questions with a classmate and compare answers.

Please **DO NOT** write on the sheets

Finding a percentage of a quantity:

Finding a percentage of a quantity can be done several ways.

Example: Find 20% of \$800.

One way this could be done is by finding 10% of the quantity first, then multiply by 2 as $2 \times 10\% = 20\%$.

Example: 10% of \$800 is \$80, therefore 20% would be $$80 \times 2 = 160 .

A second way would be to convert the percentage to a decimal, then multiply the quantity by the decimal.

Example: 20% = 0.2, therefore \$800 × 0.2 = \$160.

Which way do you think is easier? Can you think of other ways of finding the percentage of a quantity?

Task 24

Calculate the following percentages of these whole numbers.

1.	50% of 40	2.	10% of 60	3.	10% of 36	4.	20% of 45
5.	40% of 90	6.	40% of 50	7.	60% of 56	8.	60% of 90
9.	20% of 54	10.	10% of 89	11.	70% of 80	12.	60% of 50
13.	25% of 60	14.	30% of 56	15.	25% of 72	16.	75% of 96
17.	75% of 48	18.	40% of 88	19.	60% of 54	20.	90% of 80

A new computer will cost \$2250 and can be purchased with a deposit.

- 21. Calculate the deposit if 10% is required.
- 22. How much is left to pay after the deposit has been paid?

During the past 30 days, the weather conditions were recorded.

- 23. On 20% of the days it rained. Calculate the number of days it rained.
- 24. On 40% of the days it was sunny. Calculate the number of sunny days.

During the holidays, Karen has been camping with her friends.

- 25. On the first day they spent 25% of the day tramping to the camp site.

 Calculate the number of hours they spent tramping.
- 26. On the second day, they spent 40% of the day resting.
 Calculate the number of hours they spent resting.

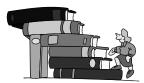

A school cross country race is run over a distance of 5400m.

- 27. If Rangi has completed 60% of the course, calculate how far he has run so far.
- 28. How far does Rangi have left to run? Give your answer as a percentage of the total distance and state the distance he has left to run.

A 36m long fence around a swimming pool is to be painted.

- 29. If 75% of the fence has already been painted, calculate the length of the fence that has been painted.
- 30. What percentage of the fence has yet to be painted?

In the school library there are 480 books.

- 31. If 60% of the books are suitable for pupils 9 years old or younger, calculate how many books that is.
- 32. If 35% of the books are fiction, calculate how many books that is.
- 33. Create word problems involving finding percentages of a quantity. Exchange your questions with a classmate and compare answers.

Please **DO NOT** write on the sheets

Adding, subtracting and multiplying with accuracy:

When you are adding, subtracting or multiplying without the use of a calculator, setting out correctly is most important.

Example: 256 + 9 + 75 + 1368 = ?

10000

- 9862

53241

× 356

Lining up the digits will help when adding or subtracting.

256 <u>× 56</u>

When multiplying, allow lines for each row of digits.

Lining up digits will help when adding up columns of digits.

Task 25

Copy each question below and show all working as you answer each question. Do not use a calculator.

Rewrite the information within each word problem below, as above, before you answer them.

In a local car sales yard there are several cars. The prices are listed below.

\$16950, \$9950, \$12<mark>500,</mark> \$8700, \$21500, \$13650, \$9500, \$17600

12. If he bought a new car worth \$21700, calculate how much money he has left.

He then buys some new carpet costing \$7450 for his house.

13. Calculate how much money he now has left.

A large business is to replace its computers with the latest models. Each computer will cost \$2450.

- Calculate the value of the computers if 27 new computers are purchased.
- 15. If the business had planned to spend \$70000 on computers, calculate how much money they will have left after purchasing the 27 computers.

A school bus travels 149km each day of the school week.

- 6. Calculate the distance the school bus would travel if it makes the same trip for 40 weeks of the year, Monday to Friday.
- 17. Create word problems involving adding, subtracting or multiplying large numbers. Exchange your questions with a classmate and compare answers.

Please **DO NOT** write on the sheets

Order of operations:

When working out answers with questions involving a mixture of operations, the order in which they are done will affect the answer. The letters BODMAS or BEDMAS will hep you to remember the order.

= brackets

= of (E = exponents)

= division

M = multiplication

= addition

= subtraction

This order means that you work out the brackets first, followed by ...

multiplying and dividing in the order they appear from left to right,

adding or subracting in the order they appear from left to right.

10 + 27 ÷ 9

Examples: $6 \times 8 + 12$

= 48 + 12

= 60

 $13 + 4 \times 3$

= 13 + 12

= 25

 $36 \div 4 - 7$ = 9 - 7

10 + 313

= 2

Task 26

Calculate the following.

1.
$$7 \times 8 + 10$$

6.
$$9 \times 7 + 17$$

8.
$$55 - 7 \times 4$$

10.
$$72 \div 12 + 9$$

13.
$$84 \div 7 + 13$$

29.
$$37 - 7 \times 5 + 11$$

Problems involving brackets.

Example:
$$3(5+4)$$
 means $3 \times (5+4) = 3 \times 9 = 27$
 $5(20-3\times6) = 5(20-18) = 5 \times 2 = 10$

Use order of operation rules to work out the answers for these questions involving brackets.

41.
$$2(3 \times 4 + 5)$$

46.
$$7(5 \times 3 + 4)$$

Copy and complete each statement by replacing the \spadesuit with +, -, \times or \div to make each statement true.

60.
$$3 \checkmark 3 \checkmark 4 = 13$$

64. $14 \checkmark 6 \checkmark 2 = 11$

65. Create 10 questions as above, where the operation signs are missing.

Exchange your questions with a classmate and have him / her add signs to make each statement true.

'In-class' Worksheet

Teaching Notes & Answers

How to use this section:

Teaching notes are enclosed in a box with a 'push-pin' at the top left corner. The teaching notes precede the answers for each worksheet / task. The teaching notes have been included to provide assistance and background information about each topic or unit of work.

Introduction:

The topic of **Number** is concerned with exploring number, gaining an understanding of the meaning of negative numbers and special numbers such as prime numbers, factors, multiples, squares, square roots and other powers. The ability to convert between fractions, decimals and percentages is explored, plus activities involving the finding of fractions and percentages of a quantity. Being able to estimate quickly and accurately and checking the reasonableness of the answer is a useful skill that is explored. The setting out, and successful completion of addition, subtraction and multiplication problems involving decimals is also investigated, leading into the conventions for the order of operations.

The importance of gaining a good understanding of the 'basic number facts', the ability to add, subtract, divide and multiply with confidence, should not be underestimated, as all strands of mathematics involve some, if not all, of the four basic skills.

Adding and subtracting whole numbers: Multiplying and dividing whole numbers: Special numbers:

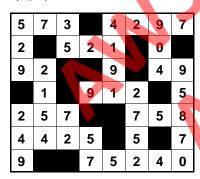

Worksheets 1 & 2

In **Tasks 1 & 2**, pupils are to copy two number crosses, then complete some addition or subtraction and multiplication or division problems as a revision activity. The copying of the number crosses is also an important skill.

In **Tasks 3 & 4**, pupils are to complete sentences about definitions of the special numbers; **factors**, **multiples**, **prime numbers** and **prime factors**. Pupils are then to work with each group to consolidate their understanding of the properties of these numbers.

Task 1

1. & 2.

Tack 2

1. & 2.

1	7	5		2	4	6	0
2		2	4	0		1	
4	9			1		9	3
	6		3	6	8		1
1	2	7			5	7	6
2	4	1	8		9		9
7			1	2	0	2	0

Note:

A prime number has only two factors - itself and 1.
2 is the only even prime number.
1 is not a prime number.

Task 3

1. prime 2. multiple 3. factor 4. prime factor 5. 2, 3, 5, 7, 11, 13, 17, 23, 29, 31

6. 41, 43, 47 7. 5, 11, 23, 31, 37, 89 8. 2 + 5 9. 2 + 13 10. 5 + 23, 11 + 17 11. 3 + 29, 13 + 19

12. 11 + 29, 17 + 23 13. 5 + 43, 7 + 41, 11 + 37, 17 + 31 14. 5, 10, 15, 20, 25, 30, 35, 40, 45, 50

15. 9, 18, 27, 36, 45, 54, 63, 72, 81, 90 16. 12, 24, 36, 48, 60, 72, 84, 96, 108, 120

17. 15, 30, 45, 60, 75, 90, 105, 120, 135, 150 18. 19, 38, 57, 76, 95, 114, 133, 152, 171, 190

19. 23, 46, 69, 92, 115, 138, 161, 184, 207, 230 20. 8, 16, 24, 32, 40 21. 21, 28, 35, 42, 49, 56 22. 39, 52, 65, 78 23. 1, 2, 3, 6 24. 1, 2, 5, 10 25. 1, 2, 3, 6, 9, 18 26. 1, 2, 3, 4, 6, 8, 12, 24

27. 1, 3, 9, 27 28. 1, 2, 3, 4, 6, 9, 12, 18, 36 29. $2 \times 7 = 14$ 30. $7 \times 11 = 77$ 31. $5 \times 7 = 35$

32. $5 \times 13 = 65$ 33. $3 \times 17 = 51$ 34. $5 \times 17 = 85$

Task 4

1, 35 2, 54

Worksheets 3 to 5

Understanding negative numbers:

Understanding and using number lines:

More negative numbers:

Bank overdrafts:

In **Task 5**, pupils are introduced to **negative numbers**, by way of everyday events that can be represented as negative numbers. Calculations involving temperature changes is a particularly good way to introduce negative numbers as weather forecasts include the liklihood of frosts, thus highlighting the use of negative numbers.

In **Task 6**, pupils are introduced to **number lines** that include negative numbers. Pupils should be familiar with number lines as they form part of x-y graphs. Using the number line, including negative numbers, pupils are to add positive and negative number together. Adding a negative number results in a movement to the left along the number line. The starting point on the number line is the first number that is in the question.

In **Task 7**, small groups of pupils are to play a number game with a die (dice). The odd numbers on the die are negative and the even numbers are positive. Pupils are to keep a running total as they roll the die 5 times. The pupil with the lowest score wins.

In **Task 8**, pupils are to further develop their understanding of negative numbers as they add larger positive and negative numbers.

In **Task 9**, pupils are to calculate a running total of a bank balance that goes in and out of overdraft. This task is a good example of negative numbers in daily use. On a bank statement, a debit balance is negative and a credit balance is positive.

Task 5

1. 5, 4, 3, 2, 1, G, -1, -2 2. -1 3. 3 4. 9m 5. 3m, 6m, 10m 6. -2m, -4m, -7m, -9m 7. -5m 8. -3m 9. $4^{\circ}C$ 10. $2^{\circ}C$ 11. $7^{\circ}C$ 12. $-4^{\circ}C$ 13. $-7^{\circ}C$ 14. $5^{\circ}C$ 15. $-8^{\circ}C$ 16. $-7^{\circ}C$ 17. $3^{\circ}C$ 18. $-6^{\circ}C$ 19. $-8^{\circ}C$ 20. $-2^{\circ}C$ 21. $0^{\circ}C$

Task 6

3. -4 4. -3 5. -9 6. -9 9. 1 10. 2 7. 4 8. -3 11. -1 12. -3 16. -4 17. 9 15. 6 18. -6 19. 7 21. 5 22. -9 23. -11 20. -6 27. 10 28. -8 29. -11 30. -9 26, 11

Task 8

1. 5 + -6 = -1 2. 7 + -3 = 4 3. 5 + -7 = -2 4. 7 + -7 = 0 5. 1 6. -3 7. -1 8. 3 9. 3 10. 2 11. -6 12. 1 13. 4 14. 0 15. 5 16. -1 17. -2 18. -1 19. 3 20. 4 21. -3 22. -3 23. -4 24. 96 25. -8 26. -25 27. -9 28. -41 29. -5

Task 9

1. Opening balance = \$250, 1st transaction balance = -\$45.00 (overdraft), 2nd transaction balance = \$40.60, 3rd transaction = -\$35.30, final transaction = \$52.20

Squares & square roots: Cubes and other powers:

In **Task 10**, pupils are to calculate the squares and square roots of various numbers. A calculator may be necessary when finding the square root of large numbers. The important point to stress is that for any square, such as 3^2 means the number is multiplied by itself, that is 3×3 and not 3×2 .

In **Task 11**, pupils are to calculate cubes and other powers of various numbers.

Example: $3^4 = 3 \times 3 \times 3 \times 3 = 81$

Task 10

1. 36 2.81 3. 144 4. 100 5. 25 6. 49 7. 64 8. 225 9. 400 10. 900 11. 10000 12. 2500 17, 53,29 18. 21.16 13. 40000 14. 1000000 15. 62500 16. 11.56 19. 34.81 27. 4 20. 7.84 21. 0.81 22. 0.0625 23. 0.7225 24. 0.0144 25. 2.3716 26. 8 29. 11 **37**. 14 30. 7 31. 5 32. 12 33. 15 34. 3 35. 30 **3**6. **10** 38, 17 40. 50

Task 11

8. 20⁵ 3.5^{6} 4.7^3 5. 9⁴ 6. 10⁶ 9. 27 11. 125 17. 343 16. 243 18. 729 19, 1296 12. 1000 13. 16 14. 32 15. 64 20. 6561 22. 10000 21. 4096 23. 3125

Equivalent fractions:

In **Task 12**, pupils are to explore equivalent fractions. A fraction of a group of diagrams has been shaded and pupils express the shaded diagrams as a fraction of the group and then match equivalent fractions. A series of progressive exercises guide pupils through the process of working out, matching and creating equivalent fractions. Some large fraction can be simplied to create smaller equivalent fractions. This can be done by dividing the numerator and denominator by the same number.

Task 12

1. $A = \frac{1}{2}$, $B = \frac{4}{10}$, $C = \frac{3}{5}$, $D = \frac{3}{6}$, $E = \frac{6}{10}$, $F = \frac{2}{3}$, $G = \frac{2}{5}$, $H = \frac{6}{9}$ 2. $\frac{1}{2} = \frac{3}{6}$, $\frac{2}{3} = \frac{6}{9}$, $\frac{2}{5} = \frac{4}{10}$, $\frac{3}{5} = \frac{6}{10}$ 3. $\frac{5}{20}$ 4. $\frac{8}{16}$ 5. $\frac{5}{25}$ 6. $\frac{4}{28}$ 7. $\frac{8}{28}$ 8. $\frac{14}{21}$ 9. $\frac{21}{56}$ 10. $\frac{25}{40}$ 11. $\frac{9}{24}$ 12. $\frac{20}{45}$ 13. $\frac{18}{33}$ 14, $\frac{33}{77}$ 15. 2 16. 5 17. 3 18. 4 19. 4 20. 9 21. 8 22. 6 23. 8 24. 25 25. 10 26. 2 27. 3 28. 1 29. 1 30. $\frac{8}{32}$ 31. $\frac{17}{34}$ 32. $\frac{12}{18}$ 33. $\frac{12}{20}$ 34. $\frac{30}{36}$ 35. $\frac{45}{60}$ 36. $\frac{9}{24}$ 37. $\frac{16}{28}$ 38. $\frac{15}{27}$

Worksheets 8 & 9

Worksheet

Expressing a fraction as a decimal: Expressing a decimal as a fraction:

Expressing a decimal as a percentage:

Expressing a percentage as a decimal:

To Task 13 public are to convert fraction

In **Task** 13, pupils are to convert fractions to decimals by dividing the numerator by the denominator. Setting out the division problem correctly is important and zeros are added after the decimal point, with the division continuing until there is no remainder or a repeating pattern is found, indicated by a small dot to the top right of the repeating digit(s). Pupils are to explore the decimal patterns created when various fractions are converted to decimals.

In **Task 14**, pupils are to perform the opposite conversion, decimals to fractions, which is less difficult as the denominator will be 10, 100, 1000, etc. depending on the number of digits after the decimal points. The fractions created will be either $^{1}/_{10}$'s, $^{1}/_{1000}$'s or $^{1}/_{10000}$'s etc.

Example: $0.5 = \frac{5}{10}$, $0.05 = \frac{5}{100}$, $0.005 = \frac{5}{1000}$, $0.0005 = \frac{5}{10000}$

- Ÿ
- In **Task 15**, pupils are to convert decimals to percentages. As percentages are out of 100, this can be done by multiplying the decimal by 100, that is, move the decimal point two places to the right.
- In **Task 16**, pupils are to convert percentages to decimals. This can be done by dividing the percentage by 100, resulting in the decimal point moving two places to the left. Remind pupils that if there is no decimal point shown in a number, then the decimal point will be at the right hand end of the number. *Example:* 65% has the decimal point after the 5, that is, 65.0%.
- In **Task 17**, pupils are to test their skills at converting between fractions, decimals and percentages, as they match examples of fractions, decimals and percentages.

Task 13

- 1. 0.25 2. 0.375 3. 0.1 4. 0.4 5. 0.625 6. 0.8 7. 0.05 8. 0.8 9. 0.5 10. 0.3
- 11. 0.6 12. 0.75 13. 0.3 14. 0.7 15. 0.5 16. 0.25 17. 0.75 18. 0.6 19. 0.6 20. 0.6
- 21. $\frac{1}{11} = 0.090^{\circ}$, $\frac{2}{11} = 0.181^{\circ}$ 8, $\frac{3}{11} = 0.272^{\circ}$ 7, $\frac{4}{11} = 0.363^{\circ}$ 6, $\frac{5}{11} = 0.454^{\circ}$ 5, $\frac{6}{11} = 0.545^{\circ}$ 4,
 - $^{7}/_{11} = 0.636^{\circ}3^{\circ}$, $^{8}/_{11} = 0.727^{\circ}2^{\circ}$, $^{9}/_{11} = 0.818^{\circ}1^{\circ}$, $^{10}/_{11} = 0.909^{\circ}0^{\circ}$

Note that pairs of numbers in each decimal add to 9

- 22. $\frac{1}{9} = 0.1111^{\frac{1}{9}} = 0.2222^{\frac{1}{9}} = 0.2222^{\frac{1}{9}} = 0.3333^{\frac{1}{9}} = 0.4444^{\frac{1}{9}} = 0.5555^{\frac{1}{9}} = 0.5555^{\frac{1}{9}} = 0.6666^{\frac{1}{9}}$
 - $^{7}/_{9} = 0.7777^{\circ}, \quad ^{8}/_{9} = 0.8888^{\circ},$
- 23. $^{1}/_{7}$ = 0.142857, $^{2}/_{7}$ = 0.285714, $^{3}/_{7}$ = 0.428571, $^{4}/_{7}$ = 0.571428, $^{5}/_{7}$ = 0.714285, $^{6}/_{7}$ = 0.857142, Note the first 6 digits after the decimal point for each fraction are the same, but in a different order. For each, the 6 digits repeat in the same order.

Task 14

- 1. $\frac{9}{10}$ 2. $\frac{9}{100}$ 3. $\frac{9}{1000}$ 4. $\frac{23}{100}$ 5. $\frac{14}{1000}$ 6. $\frac{12}{100}$ 7. $\frac{3}{10}$ 8. $\frac{302}{1000}$ 9. $\frac{42}{1000}$ 10. $\frac{3}{10}$
- 11. ³⁴⁵/₁₀₀₀ 12. ²³⁴/₁₀₀₀₀ 13. ⁹⁵/₁₀₀ 14. ⁸/₁₀ 15. ⁶⁹/₁₀₀ 16. ⁸/₁₀ 17. ⁶³⁵/₁₀₀₀ 18. ⁷/₁₀
- 19. ³⁰⁹/₁₀₀₀ 20. ⁵/₁₀₀₀₀ 21. ⁹⁴/₁₀₀ 22. ⁷/₁₀₀ 23. ⁹⁰³/₁₀₀₀ 24. ⁶³/₁₀₀ 25. ⁶²⁵/₁₀₀₀

 - Tack 17

Fraction	Decimal	Percentage
1/4	0.25	25%
1/3	0.3	33.3'%
² / ₅	0.4	40%
1/2	0.5	50%
2/3	0.6	66.6 ⁻ %
3/4	0.75	75%

Expressing a quantity as a fraction or percentage of a whole:

In **Task 18**, pupils are to express quantities as fractions or percentages of a whole, using the methods outlined on the worksheet. Using items within the classroom, similar questions can be created. *Example:* What fraction of the classroom windows are along the top of the classroom? What percentage of the class has an apple in their lunch today?

Task 18

- 1. $\frac{1}{5}$ or 20% 2. $\frac{3}{4}$ or 75% 3. $\frac{2}{5}$ or 40% 4. $\frac{2}{6}$ or 33.3°% 5. $\frac{21}{25}$ 6. $\frac{31}{250}$ 7. $\frac{29}{50}$
- 8. $\frac{5}{7}$ 9. 10. $\frac{2}{7}$ 11. $\frac{80}{100}$ = 0.8 = 80% 12. $\frac{25}{100}$ = 0.25 = 25% 13. $\frac{24}{50}$ = $\frac{48}{100}$ = 0.48 = 48%
- 14. $^{15}/_{20} = ^{75}/_{100} = 0.75 = 75\%$ 15. $^{7}/_{25} = ^{28}/_{100} = 0.28 = 28\%$ 16. $^{2}/_{3} = ^{66}/_{100} = 0.66$ = 66.6 %
- $17. \ ^{35}/_{50}$, 70% $18. \ ^{3}/_{4}$, 75% $19. \ 25\%$, $^{1}/_{4}$

Worksheets 11 & 12

Rounding numbers and finding estimates: Estimating totals involving money:

In **Task 19**, pupils are to round numbers to the nearest 10, 100 or 1000 as requested. Note that when rounding, 5's round up. *Example:* 25 rounds to 30, 150 rounds to 200, 1500 rounds to 2000 etc. If rounding decimals, the same procedure is used. *Example:* 1.5 rounds to 2.0, 1.75 rounds to 1.8 etc. Pupils are to estimate totals by rounding numbers and then check how accurate their estimates were by calculating the exact totals. Rounding / estimating is a useful skill, especially as pupils tend to believe answers they get on a calculator. By having an understanding of and the ability to estimate, calculator errors can be picked up. Word problems involving finding estimates and actual totals are included.

In **Task 20**, pupils are to estimate the cost of various shopping lists and check the reasonableness of their estimates by calculating the exact costs. Pupils are to create their own shopping lists to exchange with classmates, so that the estimates and actual cost of the lists can be worked out.

Task 19

- 12. 100 13 300 14. 700 15. 900 16. 1300 17. 1600 18. 3200 19. 4400 20. 5100
- 21, 4000 22, 2000 23, 6000 24, 8000 25, 3000 26, 7000 27, 8000 28, 7000
- 29. 10000 30. 9000 31. 100 + 200 = 300 32. 600 200 = 400 33. 80 × 30 = 2400
- 34. 500 ÷ 10 = 50 35. 1200 × 20 = 24000 36. 10000 + 3000 = 13000 37. 5000 ÷ 10 = 500
- 38. 6000 4000 = 2000 39. 281, 385, 2686, 55, 27278, 12717, 456, 2257
- 40. 150 + 200 + 90 + 110 + 170 + 130 + 190 = 1040 km 41. 1041 km 42. $1000 \times \$0.60 = \600 , \$593.37
- 43. 20 + 30 + 10 + 20 + 40 + 30 + 10 + 20 + 30 + 40 = 250 minutes 44. 244 minutes
- 45. 250 × \$0.2 = \$50.00, \$53.68

Task 20

- 1. 4 × \$2 = \$8 2. 2 × \$2 = \$4 3. 3 × \$4 = \$12
- 4. List A: \$4 + \$3 + \$2 + <mark>\$4</mark> + \$5 = \$18 List B: \$6 + \$3 + \$6 + \$4.50 + \$8 = \$27.50

 - List E: \$12 + \$15 + \$8 + \$2 + \$6 + \$3 = \$46 List F: \$9 + \$4 + \$9 + \$10 + \$4.50 + \$2 = \$38.50
 - List G: \$8 + \$9 + \$12 + \$2 + \$10 + \$9 = \$50 List H: \$16 + \$4.50 + \$9 + \$5 + \$9 + \$15 = \$58.50
- 5. List A: \$3.80 + \$2.70 + \$2.45 + \$3.95 + \$4.60 = \$17.50
 - List B: \$5.90 + \$3.10 + \$5.80 + \$4.20 + \$7.30 = \$26.30
 - List C: \$5.70 + \$5.90 + \$3.60 + \$7.90 + \$6.20 = \$29.30
 - List D: \$4.90 + \$11.85 + \$6.20 + \$5.80 + \$9.20 = \$37.95
 - List E: \$11.80 + \$13.80 + \$7.30 + \$2.45 + \$5.70 + \$2.70 = \$43.75
 - List F: \$8.70 + \$3.95 + \$9.30 + \$9.20 + \$4.20 + \$1.80 = \$37.15

Worksheet 13

Multiplying and dividing by powers of 10:

In **Task 21**, pupils are to multiply and divide by powers of 10, the first 4 are listed on the worksheet. The aim is for pupils to come up with simple rules that involve moving the decimal point left or right, a number of spaces based on the number of zeros in the power of 10, therefore the actual calculation does not need to be done. Remind pupils where the decimal points are, if they are not shown. This task introduces the concept of standard form, that will be explored at level 5 and above. *Example:* 1.2×10^4 , 3.93×10^{-2} Word problems are included.

Task 21

- 1. 530 2. 7700 3. 8400 4. 600 5. 19000 6. 637 7. 943000 8. 80500 9. 56200

- 32. 0.00015 33. 0.033
- 34. Shift the decimal point left, by the same number of places as zeros in the power of 10.
- 35. 3950 36. 0.0625 37. 962000 38. 0.03091 39. 26800 40. 9346000 41. 0.000275
- 42. 978500 43. 800 plants 44. 2.5 rows 45. \$25 46. 60 cents each 47. \$2500
- 48. 40 cents each 49. \$150000 50. \$2

Worksheet 14

Multiplying and dividing decimals:

In **Task 22**, pupils are to multiply and divide decimals, utilising skills they have learnt over the past few years. Setting out is important and the correct setting out will help to avoid errors.

Task 22

- 1. 26.784 2. 242 3. 28.74 4. 137.1 5. 2524 6. 13.587 7. 55.7 8. 11.616 9. 68.3 10. 56.24 11. 92.125 12. 63.9 13. 7.428 14. 19.968 15. 2.3808 16. 10.88 17. 6523
- 18. 0.407375 19. 5296 20. 0.002772 21. \$8783.60, \$15371.30, \$26350.80 22. \$0.015
- 18. 0.407375 19. 5296 20. 0.002772 21. \$6763.00, \$15371.30, \$26330.60 22. \$0.013

Worksheets 15 & 16

Finding a fraction of a quantity: Finding a percentage of a quantity:

In **Task 23**, pupils are to find fractions of a quantity. This can be done by dividing the quantity by the denominator and then multiplying that answer by the numerator. Word problems are included and pupils are to create and exchange word problems among themselves.

In **Task 24**, pupils are to find percentages of a quantity. This can be done using either of the two ways illustrated on the worksheet. Word problems are included and pupils are to create and exchange word problems among themselves.

Task 23

3. 6 4. 5 5.9 6. 16 7. 21 8. 12 9. 30 10. 49 11. 54 14. 49 17. 30 15. 54 16. 60 18. 64 19. 45 20. 63 22. 7 pupils 13. 50 21. 8 pupils 28. $^{3}/_{10}$, 1620m 23. 6 days 24. 18 days 25. 9hrs 26. 10hrs 27. 3780m 29. 15m

Task 24

- 1. 20 2. 6 3. 3.6 4. 9 5. 36 6. 20 7. 33.6 8. 54 9. 10.8 10. 8.9 11. 56

- 28. 40%, 2160m 29. 27m 30. 25% 31. 288 books 32. 168 books

Worksheet 17

Adding, subtracting and multiplying with accuracy:

In **Task 25**, pupils are to revisit the basic adding, subtracting and multiplying skills they should have developed over the past few years. Setting out the questions neatly with assist at avoiding making mistakes. Pupils should be able to explain the methods they are using.

Task 25

- 1. 4669 2. 5966 3. 5430 4. 1432 5. 138
- 9403 10. 53241 $\times 246$ × 356 8. 6. 348 7. 23945 64098 56418 319446 × 24 × 67 × 98 2662050 376120 1392 167615 512784 15972300 1880600 1436700 5768820 6960 **23**13138 18953796 8352 6281604 1604315
- 11. \$110350 12. \$78300 13. \$70850 14. \$66150 15. \$3850 16. 5960km

Order of operations:

Worksheet 17

In **Task 26**, pupils are to use the order of operation convention to calculate answers. The letters **BODMAS** or **BEDMAS** are a good way to remember the order of doing the calculation. At this level, problems involving exponent (powers) have been left out. The order implies the following ...

- 1. Look for brackets. If brackets are there, work out what is inside the brackets first. Example: $21 + (4 + 3 \times 6)$
- Look for multiplication and division next and work out each one out, as you read from left to right.
 Both are of equal importance. The order in which they are written in BODMAS or BEDMANS
 DOES NOT imply that dividing should be done before multiplying. At this point, only adding and / or subtracting will be left.
- 3. Look for addition and subtraction next and work these out in the order they appear as you read from left to right. Both are of equal importance. The order in which they are written in BODMAS or BEDMAS **DOES NOT** imply that adding should be done before subtracting.

The final part of the task has questions where the operation signs have been left out and pupils are to work out the missing signs, using the convention of order of operations.

Task 26

3. 46 4. 16 6.80 7. 23 8. 27 9. 6 10. 15 11. 47 1. 66 2. 60 5. 2 12. 15 13. 25 14. 75 15. 25 16. 18 17. 26 18. 25 19. 56 20. 93 21. 42 22, 28 23. 79 24. 35 25. 3 26. 27 27. 89 28. 5 29. 13 30. 29 31. 45 32. 12 33. 30 35. 22 36. 37 37. 23 38. 24 39. 10 40. 34 41. 34 42. 36 43. 10 46. 133 47. 14 48. 32 49. 15 50. 8 51. 63 52. 12 45. 16

53. $2 \times 3 + 5 = 11$ 54. $5 \times 3 - 6 = 9$ 55. $10 + 4 \times 2 = 18$ 56. $12 \div 3 + 7 = 11$ 57. $3 + 10 \div 2 = 8$ 58. $20 - 3 \times 5 = 5$ 59. $7 + 12 \div 2 = 13$ 60. $3 \times 3 + 4 = 13$ 61. $15 - 15 \div 3 = 10$ 62. $18 \div 3 + 7 = 10$ 63. $4 + 3 \times 6 = 22$ 64. $14 - 6 \div 2 = 11$

- 5. \$17.40 + \$21.65 + \$1.10 =

.....

- 6. \$4.25 × 7 =
- 7. Draw twenty-five to 4 on this clock face

- 8. Find $\frac{1}{4}$ of \$27.00
- 9. How many metres in 6.9km?
- 10. What would 7 books at \$4.65 each cost?

E: Bank overdrafts

Calculate each new balance of an account after the following transactions. The account has an opening balance of \$300.

1. Buys a new bike worth \$450.

new balance =

- 2. Sells an old bed for \$175 new balance =
- 3. Buys some new clothes worth \$105.

final balance =

F: Numbers game

Michelle rolls two dice three times, then adds the numbers.

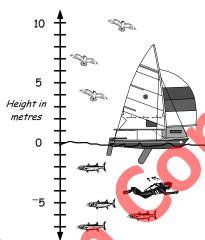

Odd numbers = $^{-1}$, $^{-3}$, $^{-5}$ Even numbers = 2, 4, 6

Calculate the total if these numbers appeared on the dice.

4, 5, 1, 6, 3, 3

B: Positive and negative numbers

State the position of the following as positive and negative numbers.

- 1. The height of the top of the mast.
 - The heights of the three

The depths of the four fish.

....,

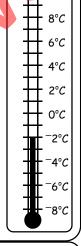

The depth of the diver.

C: Temperature changes

The temperature scale is one of the most commonly used scales that uses negative numbers.

- 1. What is the temperature shown on this diagram of a thermometer?
- What is the new temperature?

- 1			
	Starting temperature	Change	New temperature
	2°C	drops 6°C	
	_3° C	rises 8°C	
	9°C	drops 12°C	
	-2°C	drops 6°C	
	_8°C	rises 5°C	

10°C

D: Number lines

Number lines are used to represent positive and negative numbers and go on forever in both directions.

Add these positive and negative numbers together.

- 8. Find $\frac{1}{2}$ of \$7.30
- 9. How many milligrams in 4.25g?
- 10. What would 7 books at \$4.95 each cost?

B: Expressing a fraction as a decimal

Fractions can be converted into a decimal by dividing the numerator by the denominator.

Example: Write $\frac{3}{4}$ as a decimal.

Answer: $\frac{0.75}{4}$

Convert these fractions to decimals. Show your working.

G: Expressing a decimal as a fraction

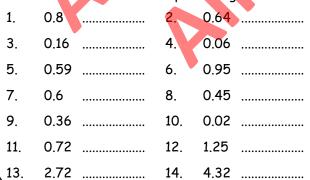

Decimals can be expressed as fractions with denominators of 10, 100, 1000, 10000, etc. Convert these decimals to fractions.

1.	0.8	 2.	0.08	 3.	0.008	
4.	0.16	 5.	0.5	6.	0.302	
7.	0.295	 8.	0.0175	 9.	0.95	
10.	0.6	 11.	0.715	 12.	0.006	
13.	0.72	14.	0.06	 15.	0.635	

D: Expressing a decimal as a percentage

Decimal × 100 = percentage.

Convert these decimals to percentages.

E: Expressing a percentage as a decimal

Percentage ÷ 100 = decimal.

Convert these percentages to decimals.

1.	45%	•••••	2.	8%	
3.	63%		4.	14%	
5.	9%		6.	21%	
7.	47%		8.	15%	
9.	23%		10.	7.3%	
11.	5%		12.	260%	·
13.	130%		14.	365%	·

Homework / Assessment Worksheet

Name: Class: Complete by:

A:	10	'Quick	Question	ıs'
----	----	--------	----------	-----

- 1. 2637 + 412 =
- 2. 986 249 =
- 3. 453 × 40 =
- 4. 975 ÷ 5 =
- 5. \$20.60 + \$1.40 + \$11.95 =

.....

- 6. \$5.94 × 6 =
- 7. Draw five to 4 on this

8. Find 25% of \$34.00

clock face

- 9. How many kilolitres in 7250L?
- 10. What would 11 books at \$3.50 each cost?

E: Word problems

Jimmy has a 200mL container of juice.

1. If he has 150mL left, what percentage of the juice has he drunk?

......

Jill is going to run 10 times around a local park.

2. What fraction of her run does she have left to do, if she has only run 3 laps?

A petrol tank holds 50L, but only has 20L left in it.

3. What percentage of a full tank of petrol has been used so far?

In Kaye's class of 30 pupils, 25 pupils went to the movies.

4. What fraction of Kaye's class did not go?

B: Converting between fractions, decimals and percentages

Complete this table using the information in the box.

Fraction	Decimal	Percentage
	0.25	
		33.3'%
² / ₅		
	0.5	
² / ₃		
		75%

0.4	50%	0.6
0.3	1/3	0.75
25%	40%	3/4
1/4	66.6'%	1/2

C: Expressing a quantity as a fraction of a whole

1. Express the shaded diagrams as a fraction of each group.

Read each statement and write the information as a fraction.

- 2. Joanne scored 19 out of 30 in a maths test.
- 3. Of 60 pets, 47 were cats.
- 4. It was sunny 4 days last week.
- 5. Sally slept for 10 hours yesterday.
- 6. What fraction of your class are boys?

D: Expressing a quantity as a % of a whole

1. Express the shaded diagrams as a percentage of each group.

A =	
B =	

Read each statement and write the information as a percentage.

- 2. Joanne scored 42 out of 50 in a maths test.
- 3. Of 20 pets, 11 were cats.
- 4. It was sunny for 5 days out of 20.5. Sally lost 7 of her 10 new pens.
- 5. Sally lost 7 of her 10 new pens.6. 8 out of 25 pupils have a cold.

Homework / Assessment Worksheet

Class: Complete by: Name:

7.

A: 10 'Quick Questions'

- 1903 + 784 =
- 2. 960 - 889 =
- 942 × 20 = 3.
- 4. 690 ÷ 5 =
- 5. \$2.10 + \$31.75 + \$11.45 =
- 6. \$1.45 × 11 =

7. Draw twenty past 11 on this

Find 25% of \$50.00 8.

clock face

- 9. How many litres in 8.25kL?
- 10 What would 10 books at \$2.10 each cost?

B: Multiplying and dividing by powers of 10

Calculate the following.

- - 5.3 × 100 =
- $5.3 \div 100$ 2.
- 4
- 25.4 × 10000 =
- 5. 762 ÷ 100 =

2.9 × 10000 =

- 6. 0.56 ÷ 10 =
- 8. 36.3 × 1000 =
- 4531 ÷ 100 =
- 4.3 ÷ 1000 =
- 0.35 × 1000 = 10.
- 11. If Jan buys 1000 envelopes at 25 cents each, how much will it cost? Give your answer in dollars.

- If Jan paid \$80.00 for a box of 100 stamps, 12. how much does one stamp cost?
- If a brick fence is to be built using 100000 13. bricks, how much will the bricks cost if each brick costs 40 cents?

C: Multiplying and dividing decimals

Calculate the following, showing your working.

- 0.06 × 9 = 1.
- 1.8 ÷ 3 =
- 0.84 ÷ 4 =
- 4. 0.06 × 0.03 =
- 0.025 × 0.5 = 5.
- 5.49 ÷ 0.09 = 6.
- 0.32 ÷ 0.8 = 7.
- 36.6 × 0.03 = 8.
- 2.34 × 0.02 = 9.
- 0.49 ÷ 0.7 = 10.

- 11. 153.9 × 70
- 12. 2.86 × 0.9
- 13. 14. 34.76 × 0.08
- 43.5 × 1.1

15.

3.

Estimated total	Actual total	Estimated total	Actual total			
2 × \$2 = \$4	2 × \$1.90 = \$3.80	4 × \$2 = \$8 4	× \$1.90 = \$7.60			
3 × \$3 = \$9	3 × \$2.90 = \$8.70	2 × \$3 = \$6 2	× \$2.90 = \$5.80			
1 × \$6 = \$6	1 × \$5.90 = \$5.90	2 × \$6 = \$12 2	× \$5.90 = \$11.80			
$\frac{1}{2}$ × \$8 = \$4	$\frac{1}{2}$ ×\$7.90 = \$3.95	3 × \$8 = \$24 3	×\$7.90 = \$23.70			
\$23	\$22.35	\$50	\$48.90			

Worksheet 8

+ 60 560km

A:

1. 2687 2. 71 3. 18840 4. 138 5. \$45.30 6. \$15.95 7. 8. \$12.50 9. **8**250L 10. \$21.00

1. 530 **2**. 0.053 3. 29000 **4**. 254000 5. 7.62 6. 0.056 7. 36300 8. 45.31 9. 0.0043 10. 350 11. \$250 12. \$0.80 or **80 cents** 13. \$40000

G:

1. 0.54 2. 0.6 3. 0.21 4. 0.0018 5. 0.0125 6. 61 7. 0.4 8. 1.098 9. 0.0468 10. 0.7 11. 10773 12. 2.574 13. 2.7808 14. 47.85 15. 53 16. 142.1 17. 0.91 18. 2042

19.	2.36	20.	43.96	2:	1. 0.462	22	2. 63.4
	× 3.7		× 0.41		× 96		× 0.065
	1652		35168		2772		3170
	7080		175840		41580		38040
	8.732		21.1008		44.352		4.1210

D:

1. 14.7km 2. 147km 3. \$0.07 4. \$7.00, \$70.00, \$31.50, \$50.75

Worksheet 9

A:

1. 106.6 2. 217 3. 7296 4. 9 5. octagon 6. \$76.00 7. 06:55 8. \$6.35 9. 8.625m 10. \$68.10

B:

1. 5 2. 8 3. 8 4. 5 5. 20 6. 12 7. 40 8. 18 9. 35 10. 10

C:

1. 4 2. 9.5 3. 28 4. 48 5. 96 6. 16.2 7. 12 8. 19 9. 45 10. 43.2

D:

1. 12 games 2. 40% 3. 18 pupils 4. 6 pupils 5. $\frac{1}{5}$ 6. 6 pupils 7. 840 people

8. 240 people 9. 10% 10. 120 people 11. 12 hours 12. 4 hours 13. 8 hours 14. $\frac{8}{24} = \frac{1}{3}$

Worksheet 10

A:

1. 2447 2. 121 3. 27450 4. 148 5. \$44.30 6. \$25.20 8. \$15.50 9. 4.95km 10. \$73.60

4909465

B:

3465 19405 1, 3891 2, 2415 3, 2560 4, 5764 5. 43106 7. × 253 × 87 × 54 24255 172424 58215 277200 2155300 970250 301455 2327724 3881000

C:

1. 56 + 10 = 66 2. 19 + 4 = 23 3. 11 - 8 = 3 4. 24 - 18 = 6 5. 27 - 20 = 7 6. 48 + 9 = 57 7. 9 + 11 = 20 8. 72 - 47 = 25 9. 54 - 41 = 13 10. 7 - 7 = 0 11. 16 + 4 = 20 12. 23 + 7 = 30 13. 8 - 6 = 2 14. 36 + 10 = 46

D:

- 1. $2(10+1) = 2 \times 11 = 22$ 2. $5(7-3) = 5 \times 4 = 20$ 3. $13+2\times 6 = 13+12=25$
- 4. $37 3 \times 7 = 37 21 = 16$ 5. $9 + 2(9 2) = 9 + 2 \times 7 = 9 + 14 = 23$
- 6. $3(10-1)+20=3\times9+20=27+20=47$

E:

1. $4 \times 3 - 5 = 7$ 2. $20 \div 4 + 6 = 11$ 3. $7 + 18 \div 3 = 13$ 4. $20 - 2 \times 7 = 6$ 5. $3 \times 8 \div 4 = 6$

F:

1. \$19.50 + \$4.40 = \$23.90 2. \$10 + \$6.25 + \$2.70 = \$18.95
