About this resource ...

Number Knowledge Series 1 - Book 8
(Code: NK8)

is one of a series of 8 resources written to support the **NUMERACY PROJECT** currently being implemented within many New Zealand schools. Within each resource in this series, the **NUMBER KNOWLEDGE FACTS** are systematically and methodically introduced, providing students with the 'building blocks' required to progress through the various **NUMBER STRATEGY STAGES**.

These resources have been compiled using the **Achievement Objectives** from the appropriate **NUMBER** and **ALGEBRA STRANDS** as stated in the document

Mathematics in the New Zealand Curriculum

and information from the various resources of the ...

Numeracy Professional Development Project

... involving the **Strategy Stages** as listed below.

	Strategy Stages
1	One-to-one Counting
2	Counting from One on Materials
3	Counting from One by Imaging
4	Advanced Counting (Counting On)
5	Early Additive Part-Whole
6	Advanced Additive Part-Whole
7	Advanced Multiplicative Part-Whole
8	Advanced Proportional Part-Whole

How to use these resources:

There are 8 resources in this series.

The table opposite suggests the Year Group each book can be used at, however this is only a suggestion.

There is NO obvious reference to Year Group or Level noted on each activity sheet, therefore the appropriate resource can be selected for your students, regardless of their Year Group.

Book	Resource Code	Suggested Year Group	Curriculum Level
1	NK1	1	1
2	NK2	2	1
3	NK3	3	2
4	NK4	4	2
5	NK5	5	3
6	NK6	6	3
7	NK7	7	4
8	NK8	8	4

This series of resources are supplied as **BLACKLINE PHOTOCOPY MASTERS**.

Available as HOMEWORK WRITE-ON WORKBOOKS

These resources can also be purchased as Write-On Student Workbooks, which are sold to pupils as **HOMEWORK / REVISION** resources and cannot be photocopied.

How to use this resource - Book 8

The purpose of this resource is for students to either develop or revise the numeracy facts learnt in previous years and utilize these facts quickly and accurately to solve a range of problems.

There are 40 activity sheets in this resource. The worksheets are divided into 2 groups of 20 and gradually get more difficult. Below is a summary of what is contained within each group of worksheets.

If the worksheet is going to be sent home, copy the appropriate section below and send this home with the first worksheet so that parents / care-givers know what to do.

Worksheets 1 to 20															
Worksheet Activity	Teaching Ideas														
A	<ul style="list-style-type: none"> In this activity, pupils are to determine how a sequence of numbers was created, complete the sequence and describe how it was created. <i>Example: 3, __, __, 33, 43, __, __, 73, __, __, 103</i> Starting at 3, skip counting in 10's 														
B	<ul style="list-style-type: none"> In this activity, pupils improve their recall of numbers and develop mental arithmetic skills as they write the numbers that come before and after a given number skip counting in 2's, 3's, 4's, 5's, 6's, 7's, 8's, 9's or 10's. 														
C	<ul style="list-style-type: none"> In this activity, pupils are to round 4 digit numbers to the nearest 10, 100 or 1000 as required 														
D	<ul style="list-style-type: none"> Questions 1 to 8 involve adding two 3 digit numbers involving carrying on the first 2 digits, with appropriate subtraction combinations and questions rearranged to allow pupils to develop alternative strategies when solving. <i>Example: $347 + 486 = 833$, $615 - 197 = 418$, $697 + 148 = 845$, $926 - 770 = 156$, etc.</i> Questions 9 & 10 are word problems, involving adding and subtracting. Questions 11 & 12, a 3 x 3 number matrix is use to enable pupils to utilise any strategy skill they know to solve these problems as quickly as possible. The matrix offers the option of adding across or down, combining numbers that add to a multiple of 10, 100 or 1000 or any other grouping. <table border="1" style="display: inline-table; margin-right: 20px;"> <tr> <td>15</td> <td>1300</td> <td>6</td> </tr> <tr> <td>400</td> <td>6</td> <td>70</td> </tr> <tr> <td>20</td> <td>180</td> <td>700</td> </tr> </table> <ul style="list-style-type: none"> Encourage pupils to talk about how they added up the numbers and compare methods used. 	15	1300	6	400	6	70	20	180	700
